YOSHON UPDATE (2) חדש/ישן

As previously advertised, there is BSD almost no concern of Chodosh this year across all types of grains, except for **CANADIAN** bread flour.

The Canadian grain has come into the UK one week earlier than expected and therefore the last date for definite Yoshon is now production code **22325** or lower.

Any **bread flour** produced after this date with **Canadian** grain will be a sofek Chodosh.

Many **strong bread flours** do have a Canadian element added though not specified.

English bread flour is Yoshon (English flour can be identified by the Red Tractor symbol on the packet. However, "Produced in the U.K." refers to the milling only and NOT to the origin of the wheat).

All products baked or manufactured with **Machzikei Hadass Hashgocho** are **Yoshon**.
